

IRTG 2235 “Searching for the regular in the irregular:
Analysis of singular and random systems”

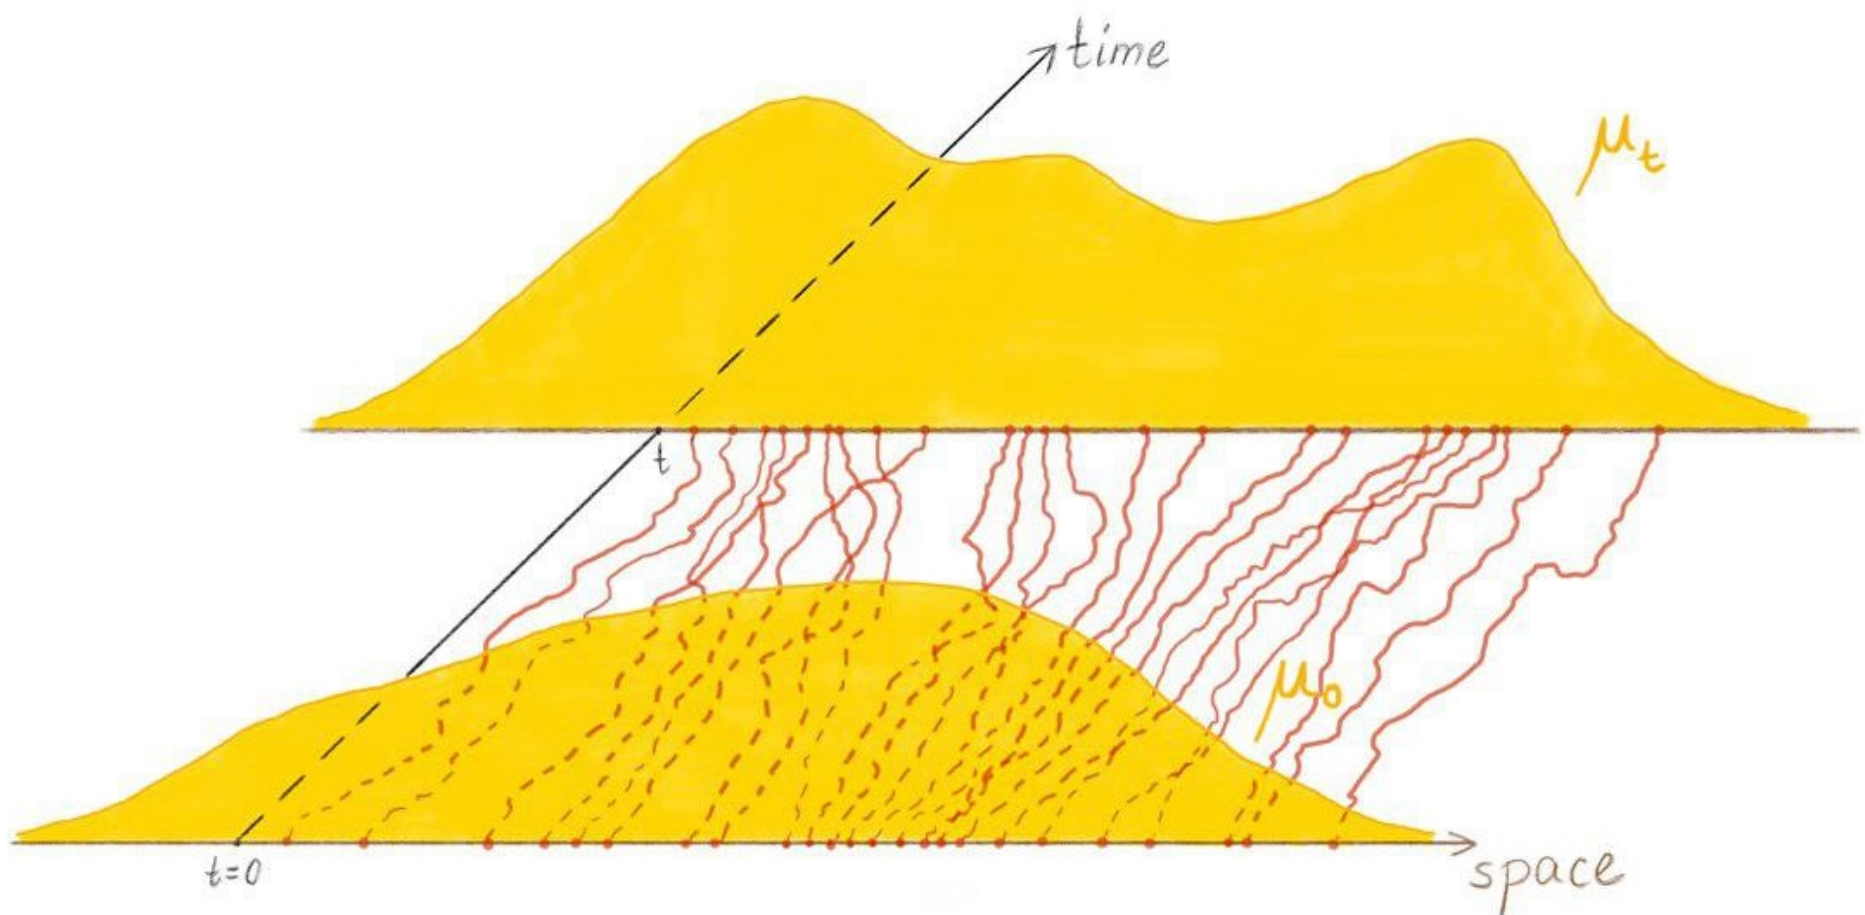

2019

IRTG summer school on probability theory and stochastic dynamics

August 19 – 23, 2019

Bielefeld University

irtg.math.uni-bielefeld.de/summerschool2019

Speakers

Vladimir Bogachev

Ornstein-Uhlenbeck operators and semigroups

Franziska Kühn

Martingale problems and their connection to Markov processes

Alexander Shaposhnikov

Introduction to Crippa - De Lellis regularity results

Alexander Veretennikov

Introduction to SDEs and their ergodic properties

Workshop

Martin Kolb

Wed 21st

Quasi-stationary distributions

An interactive workshop for young researchers
give short talks | work together | discuss

Support

Limited financial support is available for
female young researchers, see
irtg.math.uni-bielefeld.de/summerschool2019

Bielefeld Seoul

International Research Training Group 2235
